

Our organization plan many students activity to motivate undergraduate students to conduct research in their early undergraduate careers. For example, we invited faculty members to present their ongoing research to the SPS members, organized fund raising activities, and arranged outreach activities to nearby high school to present members' research. In order to provide our members an invaluable learning experience from leading experts in high energy physics, we organized a group travel to attend the APS April Meeting 2012 at Atlanta, GA.

Gold Winning Team members
Christopher Frye, Jie Liang, and Ryan Hardy

The result of The 2011 University Physics Competition was announced in the beginning of this year. We had tremendous success with the Physics Competition: all our five teams were ranked. Among them, two teams (members are Kevin Bertrand, Tommy Lee, and Joseph Kaile & Jonathan Tillett, Alex Greutman, and Cameron Glasscock) won accomplished competitor for problem B. Two teams (members are Candy Reid, Miller Hederi, and Angel Mancebo & Will Richardson, Adam Wearne, and Jonathan Lee) won bronze medal for problem B. One team won Gold Medal for Problem A whose members are Christopher Frye (Physics and Math), Jie Liang (Math), and Ryan Hardy (Physics) with team Advisor: Costas Efthimiou.
